Institutional Cash Management

Cross-border payments are being reshaped as new models around distributed ledger technology and digital money emerge. *flow* explores the role Swift plays, how the cooperative is evolving to meet rising expectations, and how emerging models are shaping – and complementing – the existing system for correspondent banking

Deutsche Bank

- Our partnership with Swift has been focused on shaping practical solutions that improve the end-to-end experience for financial institutions and corporates
- Financial institutions use their existing secure Swift connectivity to access and transact with regulated digital assets while maintaining the trust, resilience, and compliance
- In a fragmented infrastructure, correspondent banks will be rewired; winners in the future will operate globally, seamlessly orchestrate across payment ecosystems, and mobilise liquidity across traditional and digital currencies
