

Rethinking Skills and Prompts for GPT-6 Astra

Specific skill triggers

A brief description should tell the model exactly when a skill applies.

Too broad

A migration skill for any database task

Focused

A migration skill for creating, changing, or reviewing migrations

Guidance loaded as needed

For skills with several workflows, keep the entry document small.

SKILL.md

A short guide to where to look

Supporting docs and scripts hold the workflow details. Load them when they apply.

Task-specific AGENTS.md

A typo fix does not need
a full repository tour.

Service boundaries

Read the architecture guidance.

Schema changes

Read the database guidance.

Keep the references current.

Completion and boundaries

Say what to build, how to verify it, and where to stop.

[Authorize known-safe steps](#)

For example, rerunning affected local tests with disposable fixtures and no production access.

Keep meaningful review gates.
